Stretch needles are specifically designed for two way stretch knits, lycra, power net, silk jersey, spandex and other highly elasticated synthetic fabrics.

Jeans

Ideally suited for denim fabrics, heavy twill, work wear and densely woven fabrics such as canvas and heavy linens. With a very sharp point and a stiffer shank to resist needle deflection jean needles sew a straight stitch on thicker fabrics.

Leather needles feature a chisel point (designed to cut as it penetrates) for sewing leather and suedes. Never use for sewing textiles or artificial leathers.

Metalfil needles are specially designed for metallic and other embroidery threads. This needle has an enlarged polished eye which is also an aid to a sewer with restricted vision.

Quilting

Quilting needles use a specially designed point and scarf to minimise any damage to the fabric and prevent skipped stitches when sewing through quilts. For patchwork or piercing Sharps are recommended.

Thimble Fit and Size Guide

Most thimbles are used on the middle finger

If a thimble is too long and covers the finger joint it will interfere with the finger's mobility

A thimble should fit snugly, but be comfortable. It should not fall off the finger easily

Thimbles come in several sizes and are suitable for most consumers. The thimble size refers to the thimble's diameter in millimetres

Seam Ripper Consumer Guide

Seam or Stitch Rippers are an essential item in any workbasket and are always one of the best selling haberdashery products.

Use them to remove unwanted stitching - the fine point allows you to pick out single threads without the danger of cutting the fabric or taking out stitches by mistake.

Seam Rippers are an inexpensive item, and they are worth replacing when they start to lose sharpness.

It is important to keep the blade covered - it is very sharp and should be stored safely.

Using Trendy Trims Markers and Pens

The marks from fabric markers and pens can be pressed into fabrics if they are ironed. Always take off removable marks before ironing.

Be sure to test markers on a scrap piece of the project fabric before use. The marks from Vanishing Markers will disappear between 24 hours and 72 hours after use, depending on fabric type, room temperature, and humidity.

All Trendy Trim Felt Tip Markers are packed with tips facing down. This helps to keep the tips moist and ready to use when stored. Some markers will dry up about 2 years after the date of manufacture.

Hooks and Eyes

All standard Hooks & Eyes are made from BRASS to ensure they will not rust.

Reusable plastic storage boxes store remaining hooks and eyes for future projects.

RETAILER TIP:

Make sure your customers always use a good quality thread to attach hooks and eyes: poor quality threads will fray over time against the metal and break, destroying the closure.

RIT Dyemore Polyester Fabric Dye

Rit Dyemore enables synthetic materials to be dyed. This means polyester, polyester blends, acetate and acrylic are now all dyeable with Rit.

While nylon has always been a material Rit could dye, it dyes to even richer shades with DyeMore.

It is now even possible to dye golf balls, Rit DyeMore allows you to dye these items bright, beautiful colours. It can also dye your 3D printed creations too.
